INTRODUCTION

MedStar Family Choice District of Columbia (MFC-DC) is pleased to provide the *2022 DC Healthy Families and DC Healthcare Alliance Prescribing Guide* for the District of Columbia. This Prescribing Guide is to be used when prescribing for patients covered by the pharmacy plan offered by MFC-DC. **This is a closed formulary and only those drugs listed in this formulary will be covered by MFC-DC for the DC Healthy Families Medicaid and DC Healthcare Alliance enrollees unless a Medical Exception is requested and approved by MFC-DC.**

HIV/AIDS medications, PEP, and PrEP for DC Healthy Families beneficiaries are covered through the District of Columbia Fee-for-Service and are not the responsibility of MFC-DC.

For DC Healthcare Alliance beneficiaries, medications for the treatment of HIV/AIDS are supplied through the AIDS Drug Assistance Program (ADAP). All enrollees must apply to the ADAP program and renew every 6 months. Prescriptions for HIV and AIDS medications must be filled at ADAP-participating pharmacies. Prescriptions for PEP and PrEP may be filled at any MFC-DC in-network pharmacy. PLEASE NOTE ON THE PRESCRIPTION that the intended use of the medication is for PEP or PrEP as this will assist the pharmacy in processing the prescription expeditiously. For example, include the phrase, "for PrEP" anywhere on the prescription.

The drugs listed in this *2022 DC Healthy Families and DC Healthcare Alliance Prescribing Guide* have been reviewed and approved by the MFC-DC Pharmacy and Therapeutics Committee. The drugs have been selected to provide the most clinically appropriate and cost-effective medications for patients who have drug benefits administered through MFC-DC. There may be occasions when an unlisted drug is desired for medical management of a specific patient. In those instances, the unlisted medication may be requested through the Medical Exception process.

*The information contained in this formulary and its appendices is provided solely for the convenience of medical providers. This formulary is subject to state-specific regulations and rules, including, but not limited to, those regarding generic substitution, controlled substance schedules, preference for brands and mandatory generics whenever applicable. MFC-DC does not warrant or assure accuracy of such information nor is it intended to be comprehensive in nature. This formulary is not intended to be a substitute for the knowledge, expertise, skill and judgment of the medical provider in his or her choice of prescription drugs. MFC-DC does not assume responsibility for the actions or omissions of any medical provider based upon reliance, in whole or in part, on the information contained herein. **The medical provider should consult the drug manufacturer's product literature or standard references for more detailed information.***

PREFACE

The DC Healthy Families and DC Healthcare Alliance Prescribing Guide is organized by sections. Each section includes therapeutic groups identified by either a drug class or disease state. All drugs listed were selected to be on this formulary. Products are listed by generic name. Brand-name products are included as a reference to assist in product recognition. Unless exceptions are noted, generally all dosage forms and strengths of the drug cited are covered.

This formulary covers selected over-the-counter (OTC) products. You are encouraged to prescribe them when clinically appropriate. A prescription (written or telephoned) is also required for OTC medications and refills are permitted. Prescription medications for chronic conditions should be written as a 30 or 90-day supply with refills. Prescription and OTC medications can be refilled for a maximum of 12 months. For covered OTC products refer to the Over-The-Counter (OTC) Drug Coverage section that is located near the end of the introductory sections of this formulary. Mail order service for prescriptions is also available for enrollees of MFC-DC.

PHARMACY AND THERAPEUTICS (P&T) COMMITTEE

The MedStar Family Choice District of Columbia Pharmacy and Therapeutics Committee (MFC-DC P&T) includes physicians, pharmacists, and nurses. The Committee meets quarterly to evaluate drugs for formulary inclusion and to develop policies concerning formulary and drug utilization management. Please visit the MFC-DC website at **MedStarFamilyChoiceDC.com** to view the decisions of the MFC-DC P&T Committee and any applicable changes. The main features of the MFC-DC P&T Policies are also on the website in the FAQs.

PRODUCT SELECTION CRITERIA

The MFC-DC P&T Committee considers clinical information on new-to-market drugs that are typically included in an outpatient pharmacy benefit. The evaluation includes all or part of the following:

- Safety
- Efficacy
- Comparison studies
- Approved indications
- Adverse effects
- Contraindications/Warnings/Precautions
- Pharmacokinetics
- Patient administration/compliance considerations

When a new drug is considered for formulary inclusion, it will be reviewed relative to similar drugs currently on formulary. In addition, the entire *DC Healthy Families and DC Healthcare Alliance Prescribing Guide* is reviewed on an annual basis.

All the information in the DC Healthy Families and DC Healthcare Alliance Prescribing Guide is provided as a reference for drug therapy selection. Specific drug selection for an individual patient rests solely with the prescriber.

GENERIC AVAILABILITY

Boldface type of a generic drug name in this book indicates generic availability of that product. However, not all strengths or dosage forms of the generic name in boldface type may be generically available. In some cases, **the brand name listed is a generic drug**. Examples of the latter include Ery-tab and Zovia.

GENERIC SUBSTITUTION

Generic substitution is a pharmacy action whereby a generic version is dispensed rather than a prescribed brand-name product. An important consideration for generic substitution is the knowledge that all approvals of generic drugs by the FDA since 1984, and many generic approvals prior to 1984, have a showing of bioequivalence between the generic versions and the reference brand product. To gain FDA approval:

1. The generic drug must contain the same active ingredient(s), be the same strength and the same dosage form as the brand-name product.
2. The FDA has given the generic an "A" rating compared to the branded product indicating bioequivalence and has determined the generic is therapeutically equivalent to the reference brand. The ratings of generic drugs are available by referring to the FDA reference, *Approved Drug Products with Therapeutic Equivalence Evaluations* (Orange Book).

When the above two criteria are met, a generic can be substituted with the full expectation that the substituted product will produce the same clinical effect and safety profile as the prescribed product. Drug products that have a narrow therapeutic index (NTI) can also be guided by these principles. It is not necessary for the health care provider to approach any one therapeutic class of drug products (e.g., NTI drugs) differently from any other class, when there has been a determination of therapeutic equivalence by the FDA for the drug products under consideration. Also, additional clinical tests or examinations by the physician are not needed when a therapeutically equivalent generic drug product is substituted for the brand-name product.

It is recommended that generic substitution not be exercised by the pharmacist with multisource products that appear in the Orange Book and carry a "B" rating, indicating that these products cannot be considered therapeutically equivalent to other products in the group.

MAIL SERVICE PRESCRIPTIONS

Mail order is available for chronic medications. A 90-day supply will be provided to enrollees using mail order services. To start the process, prescribers may call CVS Caremark Mail Service Pharmacy™ at **800-996-5772** or they may submit a prescription to the CVS Caremark Mail Service Pharmacy. Additional information can be found at the MFC-DC website, **MedStarFamilyChoiceDC.com** or at **caremark.com**.

Simply write the prescription(s) for a 90-day supply and have the enrollee submit it with their mail-service request forms to the address listed on the Mail Service Order Form. Prescribers may also call **800-996-5772** to start the process.

Please note that medications ordered and processed through mail service are typically mailed to the enrollee via U.S. regular mail. As such, please advise enrollees to allow up to 14 days for delivery from the time mail service receives the request. Any prescriptions submitted to mail service for less than a 90-day supply may be returned to the enrollee.

Enrollees are also able to order their prescriptions from CVS Caremark Mail Service Pharmacy. Receiving a 90-day supply of medication by mail may prove to be more convenient for enrollees, especially when filling prescriptions for routine or maintenance type medications. Mail service may also help enrollees stay compliant with their medications.

MEDICAL EXCEPTION

If a drug not listed in this formulary is desired for medical management of a patient, a medication exception may be requested by calling MFC-DC at: **855-798-4244**. Prescribers may send supporting documentation for medication request via facsimile to 202-243-6258.

PRIOR AUTHORIZATION (PA)

If a medication on Prior Authorization is needed for an enrollee, it can be requested by calling MFC-DC at **855-798-4244** from 8 a.m. to 5:30 p.m. After hours, follow the instructions in the after-hours pharmacy message on the main telephone line. Prescribers may send supporting documentation for medication request via facsimile to 202-243-6258.

MANAGED DRUG LIMITATIONS (MDL)

The Managed Drug Limitation program provides for a maximum quantity of drug product that an enrollee may receive per prescription and/or over a specific period of time. Many drug products on the *DC Healthy Families and DC Healthcare Alliance Prescribing Guide* have quantity limits based upon the dosage described in product labeling.

MFC-DC limits "new" opioid analgesic prescriptions to a 7-day supply. A "new" prescription means that a patient has not had an opioid medication filled under MFC-DC in the preceding 90 days or had one short-acting opioid at ≤ 50 morphine milligram equivalents (MME) per day in the previous 90 days, filled within 7 days of a subsequent request. New prescriptions for more than 7-day supply will require Prior Authorization.

The following drugs are subject to MDL because they are typically not taken on a regular schedule and/or because of potential safety and utilization concerns. This list is subject to change. Contact MFC-DC at **855-798-4244** for an updated list.

STEP THERAPY (ST)

Drugs indicated with a "ST" require Step Therapy authorization for coverage. When using drugs within select drug classes, this program requires a certain order to be followed for the "ST" designated drugs to be covered by your benefit plan.

Within the Step Therapy program, drug therapy is begun with the most cost-effective and safest drugs. If this initial therapy proves unsuccessful, treatment may move to other therapy-based criteria approved by the MFC-DC P&T Committee. Step Therapy helps ensure that a plan enrollee receives clinically appropriate, cost-effective medication.

The following drugs are subject to Step Therapy:

Drugs

ciclopirox cream, suspension (LOPROX)
 EUCRISA
 ivermectin lotion
 VYVANSE

OVER-THE-COUNTER (OTC) DRUG COVERAGE

In addition to prescription benefits, all over-the-counter medications on this list are covered by MFC-DC with a written or telephoned prescription. Refills are permitted. Prescriptions may be written for the State limited 12-month maximum. Emergency contraceptives and latex condoms are an exception and do not need a prescription. OTC products covered are restricted to generics when available. Brand names are provided as reference only. If both prescription and OTC products are available, you are encouraged to prescribe OTC products when clinically appropriate.

ANTIRETROVIRAL AGENTS

HIV/AIDS medications, PEP, and PrEP for DC Healthy Families beneficiaries are covered through the District of Columbia Fee-for-Service only and are not the responsibility of MFC-DC.

For DC Alliance beneficiaries, medications for the treatment of HIV/AIDS are supplied through the AIDS Drug Assistance Program (ADAP). All enrollees must apply to the ADAP program and renew every 6 months. Prescriptions for HIV and AIDS medications must be filled at ADAP-participating pharmacies. Prescriptions for PEP and PrEP may be filled at any MFC-DC in-network pharmacy. PLEASE NOTE ON THE PRESCRIPTION that the intended use of the medication is for PEP or PrEP as this will assist the pharmacy in processing the prescription expeditiously. For example, include the phrase, "for PrEP" anywhere on the prescription.
